

Tutorial: utilizando a VPN UFSM no MAC OS

1. Acessar o endereço: <https://vpn.ufsm.br>
2. Inserir credenciais utilizadas para acessar os portais (aluno, servidor ou professor): CPF e senha

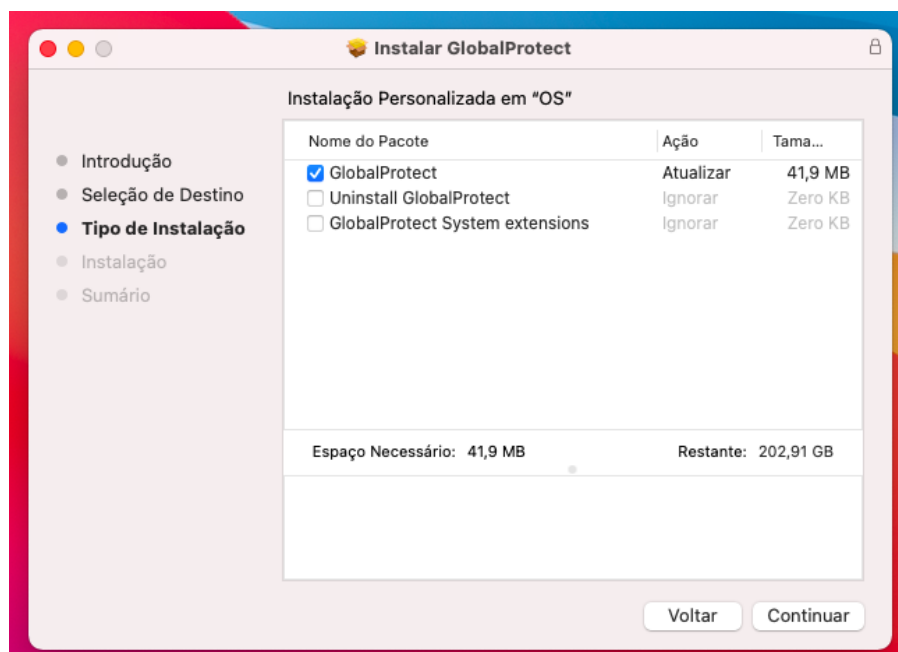

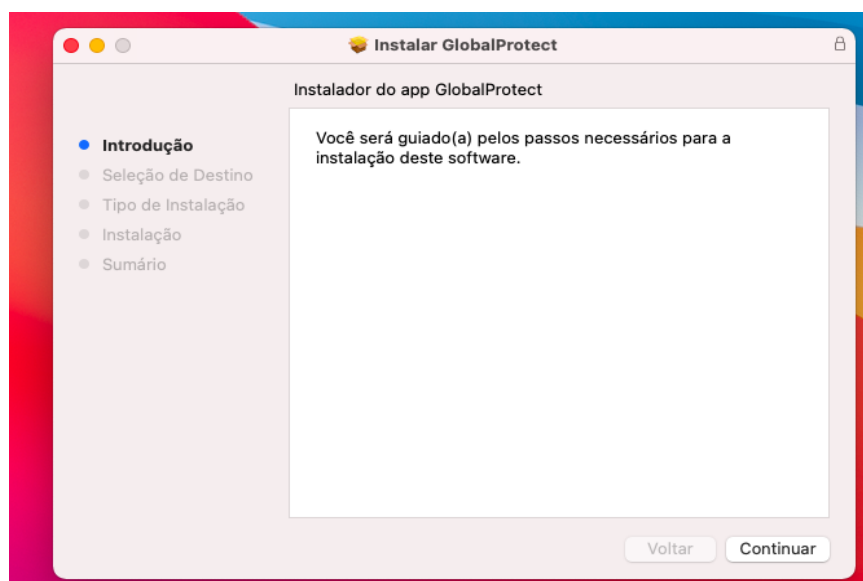

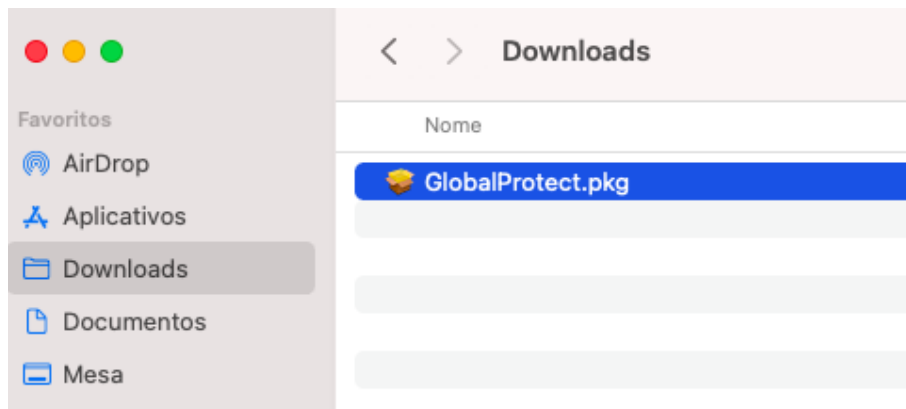

The image shows the login page for the VPN UFSM. At the top is the UFSM logo, which features a blue shield with a white anchor and three yellow flames above it, with the motto 'SEDES SAPIENTIAE' on a banner below. Underneath the logo is the text 'UFSM' in a large, white, serif font. Below that is 'VPN UFSM' in a smaller, blue, sans-serif font. There are two input fields: 'Usuario' and 'Senha', both with white text labels and empty white boxes. Below the 'Senha' field is a blue button with the text 'LOG IN' in white.

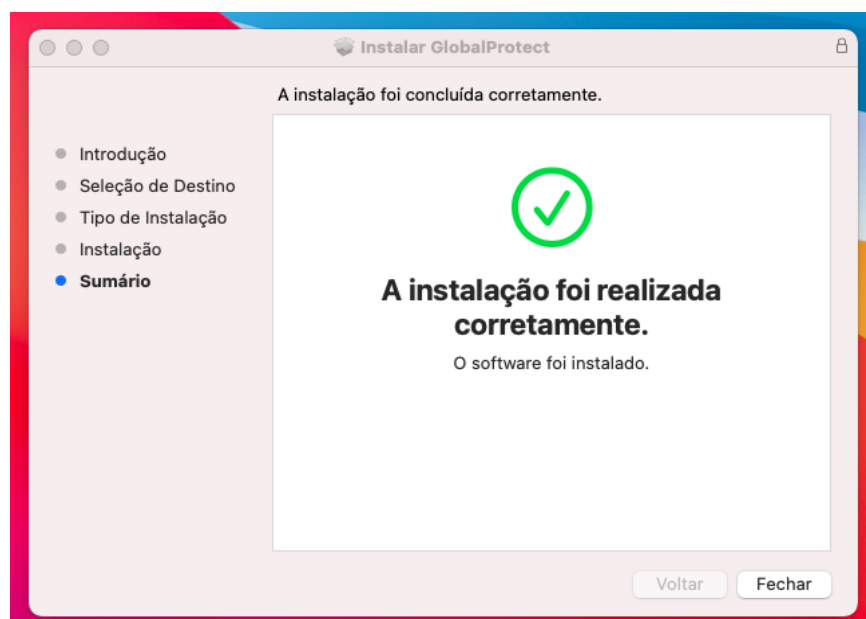

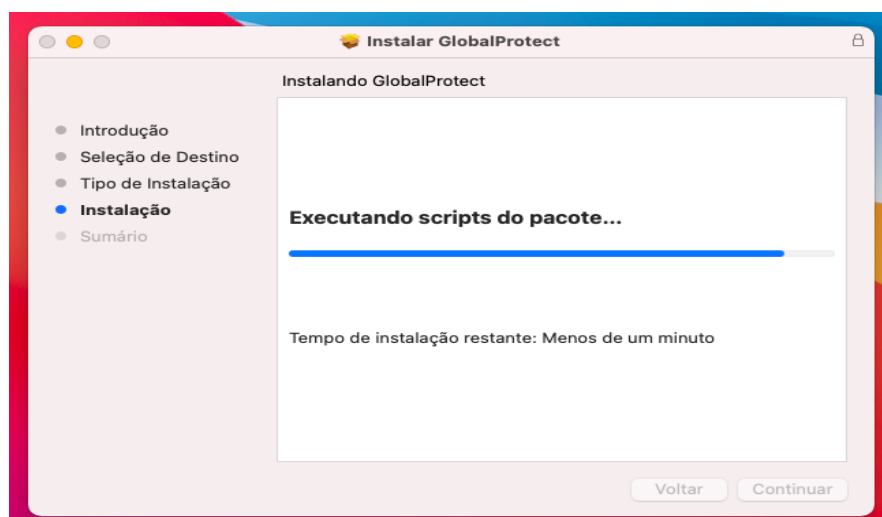

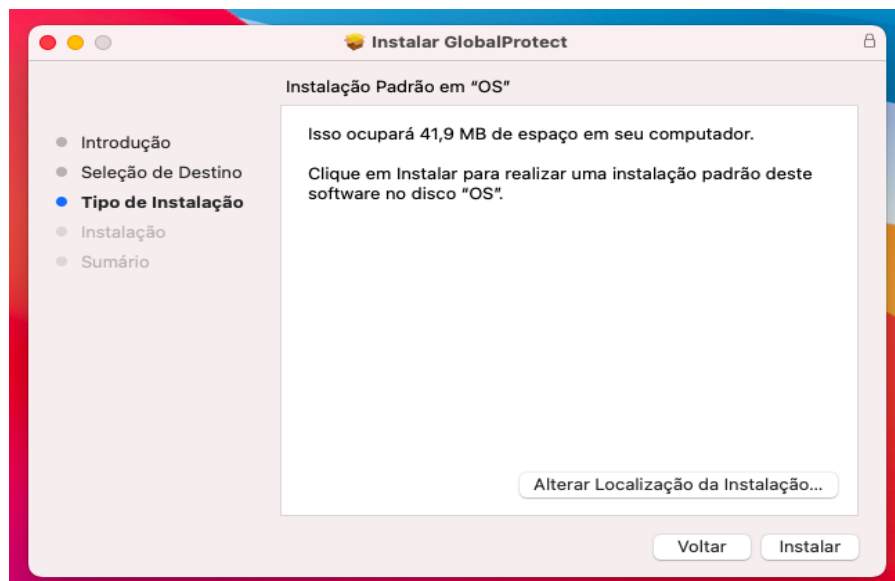

3. Realizar o download do software (verificar se o sistema operacional é 32 ou 64 bits)

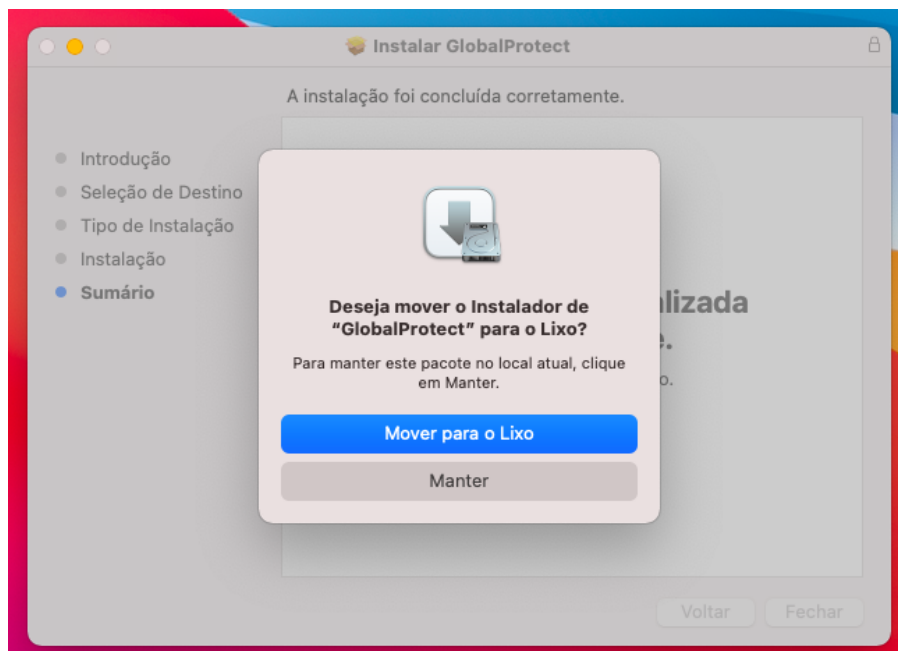

The image shows the download page for the VPN UFSM. It features the same UFSM logo and 'UFSM' text as the login page. Below 'VPN UFSM', there are three links for downloading the GlobalProtect agent: 'Download Windows 32 bit GlobalProtect agent', 'Download Windows 64 bit GlobalProtect agent', and 'Download Mac 32/64 bit GlobalProtect agent'. Below these links, there are three paragraphs of text: 'Windows 32 bit OS needs to download and install Windows 32 bit GlobalProtect agent.', 'Windows 64 bit OS needs to download and install Windows 64 bit GlobalProtect agent.', and 'Mac OS needs to download and install Mac 32/64 bit GlobalProtect agent.'

4. Instalar o aplicativo: navegar até o local onde o arquivo baixado foi armazenado e clicar duas vezes nele para iniciar a instalação

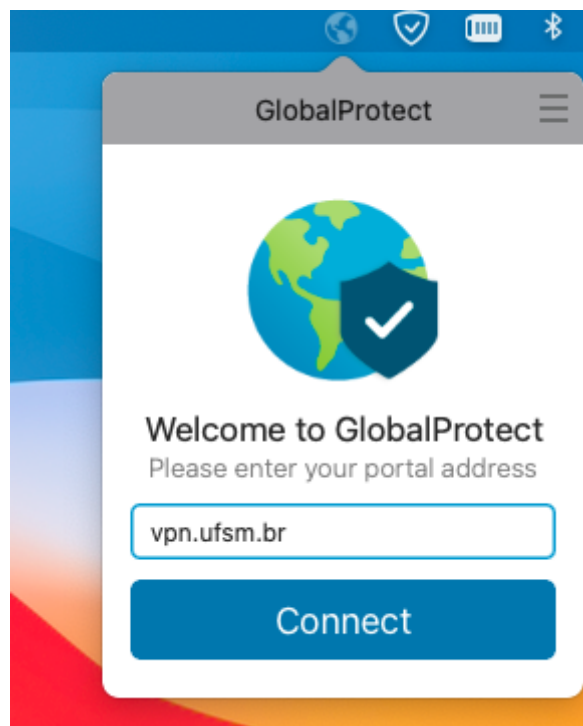

Após a instalação, o arquivo pode ser removido, caso deseje.

5. Iniciar o aplicativo: após a instalação, o aplicativo deve ser aberto automaticamente. Caso não ocorra, pesquise por GlobalProtect nos seus aplicativos instalados (pesquisar via Launchpad ou Spotlight).
6. Conectar no servidor: Digite `vpn.ufsm.br` e após clique em Connect

7. Inserir credenciais utilizadas para acessar os portais (aluno, servidor ou professor) e após clicar em **Sign In**

8. Pronto, conectado a VPN UFSM

9. Para desconectar da VPN UFSM, abra o aplicativo GlobalProtect e clique em **Disconnect**
