

UFSM

no Windows

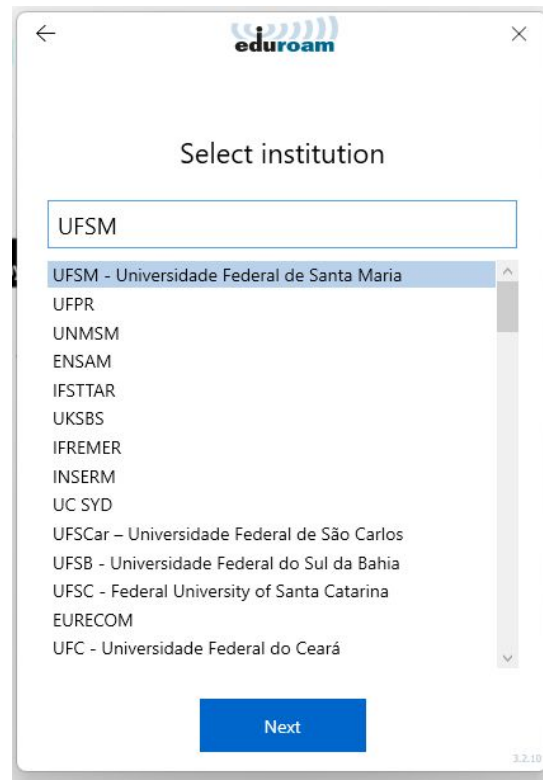

1. Acesse o site <https://www.geteduroam.app/> e faça o download do aplicativo para o Windows.

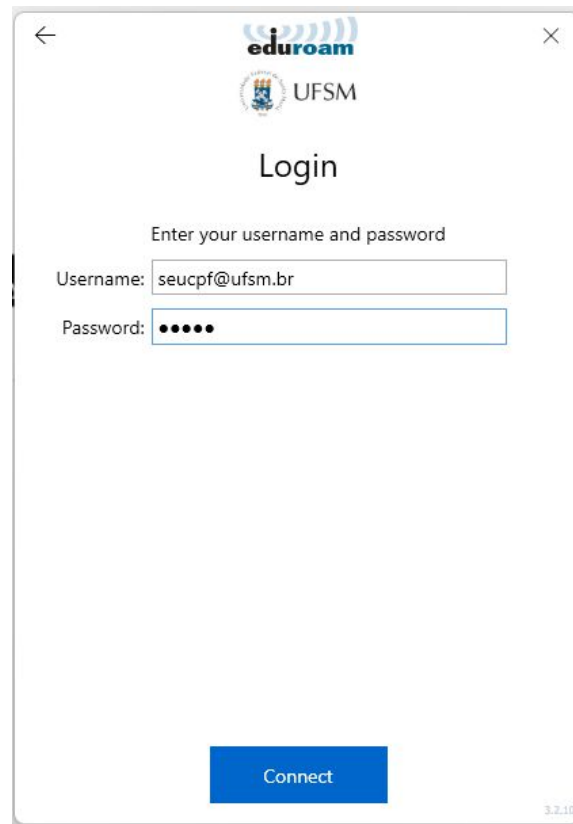

The screenshot shows the website for 'geteduroam'. The header is blue with the text 'geteduroam' and navigation links for 'Home', 'Apps', 'GitHub', and 'Mailing list'. A sidebar on the left lists various pages like 'Introduction to geteduroam', 'Project goals', 'Frequently Asked Questions', 'User instructions', 'Connecting using geteduroam', 'IdP information', 'Pseudo-credential and CAT', 'Developers', 'Contributing to geteduroam', and 'API for obtaining client certificates'. The main content area features the 'geteduroam' logo (a blue square with a white Wi-Fi symbol), the text 'geteduroam', and 'NORUnet, DeiC, SURF, Uninett'. Below this are three download buttons: 'GET IT ON Google Play', 'Download on the App Store', and 'Windows'. The 'Windows' button is highlighted with a red rectangular box. At the bottom, a paragraph states: 'geteduroam is a project to **simplify the process of connecting to eduroam** for end users'.

2. Abra o aplicativo  geteduroam

3. No aplicativo, clique em “Connect to eduroam”, pesquise por “UFSM”, selecione “UFSM - Universidade Federal de Santa Maria” e depois clique em “Next”.

4. Com o perfil da UFSM selecionado, clique em "Next". Na tela de login preencha com seu CPF+@ufsm.br (Exemplo: 01234567810@ufsm.br) e a mesma senha dos portais da UFSM (Portal do Aluno, Portal do Servidor). Depois clique em "Connect".

5. Pronto, agora você está conectado a rede eduroam! Clique em “Close” para fechar o aplicativo.
