IEEE CASS Santa Maria Workshop

Santa Maria, Brazil
Centro de Tecnologia, UFSM

April 6, 2018

CALL FOR PARTICIPATION

The IEEE Circuits and Systems Society Santa Maria Workshop is an event intended for academic exchange between researchers, professionals and students from the region and from around the world. This first edition in Santa Maria will receive Leandro Indrusiak and Ricardo Reis as invited speakers. The workshop program will cover two important topics on Circuits and Systems:

Leandro Indrusiak (University of York) Priority-based Wormhole Networks, reviewing the latest research on analytical methods aimed at predicting worst-case packet latency over such network

Ricardo Reis (UFRGS) Low Power Challenges in IoT and IoE, providing the concept of Internet of Things, that together with Internet of Health, Internet of People and Internet of Something is constructing the Internet of Everything (IoE)

General Chair:
Leonardo Londero de Oliveira (UFSM)

CASS Liaison
Ricardo Reis (UFRGS)

CASS RS Chapter Chair:
José Rodrigo Azambuja (UFRGS)

Registration is free and open to public

Sessions about CASS network opportunities and Cadence Academic Network will also be available
